Experience

Far Eastern University Institute of Technology Information System Development and Training Unit

Sampaloc, Manila

Full Stack Junior Software Developer Intern

April – November 2025

- Designed and developed a hospital-internal Picture Archiving and Communication System (PACS) for ophthalmic imaging
- Implemented secure image upload, storage, and retrieval within a hospital local network
- Applied role-based access control to restrict system functionality for clinicians and administrative staff
- Leveraged AI-assisted development tools to improve coding efficiency, debugging, and system refinement
- Collaborated with hospital personnel to align system features with clinical workflow requirements
- Delivered an end-to-end system independently, covering requirements analysis, development, testing, and deployment

Skills

- **Multilingual**
 - Mandarin
 - Hokkien
 - Filipino
 - English
- **Tech Stacks**
 - HTML
 - CSS
 - JavaScript
 - TypeScript
 - PHP
 - Java
 - C#, C++
 - Python
 - Vue JS
 - Laravel
 - React JS
 - MySQL
 - Tailwind CSS
 - Bootstrap
 - Kotlin
 - Swift
 - Flutter
 - Dart
 - Laragon
 - XAMPP
 - Linux OS
 - Docker
 - Git
 - GitHub
 - Windows Server 2012 R2
 - Cisco (CCNA)
 - AI Integration

Certifications

Project Management Institute PMI Project Management Ready	March 27, 2025
Certiport IT Specialist - Cybersecurity	March 26, 2025
Cisco Networking Academy NDG Linux Essentials	May 17, 2024
Cisco Networking Academy DevNet Associate	April 27, 2024
Cisco Networking Academy CCNA: Enterprise Networking, Security, and Automation	December 05, 2023
Cisco Networking Academy CCNA: Switching, Routing, and Wireless Essentials	September 13, 2023
Certiport IT Specialist - Networking	July 13, 2023
Cisco Networking Academy CCNA: Introduction to Networks	April 16, 2023
Confucius Institute Headquarters HSK (Level 4)	September 22, 2019

Projects

FitGroove

July 2026

- Tech stacks: Flutter, Dart, SQLite, Riverpod, Drift, GoRouter, NSD, Kotlin, Swift
- Built a cross-platform fitness tracking application featuring workout planning, routine management, and real-time workout session logging.
- Designed an offline-first architecture using Drift and Riverpod for reactive local data management and scalable state handling.
- Implemented secure peer-to-peer workout sharing over local Wi-Fi using Network Service Discovery (NSD) and an embedded HTTP server, eliminating cloud dependency.
- Developed reusable, modular UI components with drag-and-drop interactions, adaptive light/dark themes, and customizable metric/imperial unit support.

Laboratory Information Management System

March 2026

- Tech stack: Laravel, Blade, Alpine JS, Tailwind CSS, MySQL
- Utilized AI-assisted tools such as GitHub Copilot and Claude AI to streamline development, assist in debugging, and improve code quality through iterative refinement
- Designed and developed a full-stack laboratory management system to handle lab requests, sample tracking, test processing, and result validation workflows
- Built role-based modules for technicians, supervisors, and administrators to manage laboratory operations efficiently
- Designed a modern and responsive UI using Laravel and frontend technologies for improved usability in clinical environments

DOH East Avenue Medical Center Picture and Archiving and Communication System

April 2025

- Designed and developed a medical imaging and media management system for storing, retrieving, and viewing diagnostic images
- Built secure workflows for uploading, archiving, and accessing patient imaging records
- Developed an intuitive dashboard for managing imaging requests, results, and patient records

Small Grocery Store Point of Sale System

August 2025

- Tech stack: Laravel, Livewire, MySQL, PHP, Tailwind CSS
- Built an order and delivery management system with real time tracking
- Generate sales report to support business decision making and performance monitoring
- Improved operational efficiency by centralizing sales, inventory, and delivery workflows into a single system

Bleep

December 2025

- Tech stack: Laravel, VueJS, MySQL, PHP, Reverb, Tailwind CSS
- A modern microblogging platform inspired by X (formerly Twitter) using Laravel and Vue JS
- Extended the base Laravel Chirper into a fully functional application with custom features
- Implemented real-time messaging using Laravel Reverb WebSocket for live chat functionality

Capstone Compass

Dec 2024

- Tech stack: Laravel, Blade, Tailwind CSS, MySQL
- Collaborated with a team of five to design and develop a web-based system for tracking thesis progress and milestones
- Developed features for managing student submissions, progress updates, and documentation records in a group chat with thesis mentor
- Implemented structured workflows to help monitor project timelines and completion status
- Contributed to system design, database structuring, and feature implementation in a collaborative environment

TrailVenture

June 2024

- Tech stacks: React JS, Tailwind CSS, Firebase
- Collaborated in a team to design and develop a modern e-commerce web application
- Implemented core e-commerce features such as product listings, user authentication, and order management
- Practiced component-based architecture and state management in a collaborative development environment
- Designed a clean and intuitive UI/UX to improve user navigation and shopping experience

Education

Far Eastern University Institute of Technology

Sampaloc, Manila

Bachelor of Science in Information Technology Specializing in Web and Mobile Application

December 2025

Capstone Project: VIAMM: An Assistive Technology Management System for Visually Impaired with Mobile Money

Recognition

- People's Choice Award
- Best Mobile Application

Philippine Cultural College Main Campus
Elementary, High School

Tondo, Manila
March 2021
