Jesus Jansen Lee

Binondo Manila City, Metro Manila 1006 • janseeeenleeee@gmail.com • 09054672361

Education

Far Eastern University Institute of Technology Sampaloc, Manila
Bachelor of Science in Information Technology Specializing in Web and Mobile Application December 2025

Capstone Project: VIAMM: An Assistive Technology Management System for Visually Impaired with Mobile Money Recognition

- People's Choice Award
- Best Mobile Application

Philippine Cultural College Main Campus Tondo, Manila
Elementary, High School March 2021

Experience

Far Eastern University Institute of Technology Information System Development and Training Unit Sampaloc, Manila
Full Stack Junior Software Developer Intern April – November 2025

- Designed and developed a hospital-internal Picture Archiving and Communication System (PACS) for ophthalmic imaging
- Implemented secure image upload, storage, and retrieval within a hospital local network
- Applied role-based access control to restrict system functionality for clinicians and administrative staff
- Leveraged AI-assisted development tools to improve coding efficiency, debugging, and system refinement
- Collaborated with hospital personnel to align system features with clinical workflow requirements
- Delivered an end-to-end system independently, covering requirements analysis, development, testing, and deployment

Certifications

Project Management Institute | PMI Project Management Ready March 27, 2025
Certiport | IT Specialist - Cybersecurity March 26, 2025
Cisco Networking Academy | NDG Linux Essentials May 17, 2024
Cisco Networking Academy | DevNet Associate April 27, 2024
Cisco Networking Academy | CCNA: Enterprise Networking, Security, and Automation December 05, 2023
Cisco Networking Academy | CCNA: Switching, Routing, and Wireless Essentials September 13, 2023
Certiport | IT Specialist - Networking July 13, 2023
Cisco Networking Academy | CCNA: Introduction to Networks April 16, 2023
Confucius Institute Headquarters| HSK (Level 4) September 22, 2019

Projects

Laboratory Information Management System March 2026

- Tech stack: Laravel, Blade, Alpine JS, Tailwind CSS, MySQL
- Utilized AI-assisted tools such as GitHub Copilot and Claude AI to streamline development, assist in debugging, and improve code quality through iterative refinement
- Designed and developed a full-stack laboratory management system to handle lab requests, sample tracking, test processing, and result validation workflows
- Built role-based modules for technicians, supervisors, and administrators to manage laboratory operations efficiently
- Designed a modern and responsive UI using Laravel and frontend technologies for improved usability in clinical environments

DOH East Avenue Medical Center Picture and Archiving and Communication System April 2025

- Designed and developed a medical imaging and media management system for storing, retrieving, and viewing diagnostic images
- Built secure workflows for uploading, archiving, and accessing patient imaging records
- Developed an intuitive dashboard for managing imaging requests, results, and patient records

Small Grocery Store Point of Sale System August 2025

- Tech stack: Laravel, Livewire, MySQL, PHP, Tailwind CSS
- Built an order and delivery management system with real time tracking
- Generate sales report to support business decision making and performance monitoring
- Improved operational efficiency by centralizing sales, inventory, and delivery workflows into a single system

Bleep December 2025

- Tech stack: Laravel, VueJS, MySQL, PHP, Reverb, Tailwind CSS
- A modern microblogging platform inspired by X (formerly Twitter) using Laravel and Vue JS
- Extended the base Laravel Chirper into a fully functional application with custom features
- Implemented real-time messaging using Laravel Reverb WebSocket for live chat functionality

Capstone Compass Dec 2024

- Tech stack: Laravel, Blade, Tailwind CSS, MySQL
- Collaborated with a team of five to design and develop and web-based system for tracking thesis progress and milestones
- Developed features for managing student submissions, progress updates, and documentation records in a group chat with thesis mentor
- Implemented structured workflows to help monitor project timelines and completion status
- Contributed to system design, database structuring, and feature implementation in a collaborative environment

TrailVenture June 2024

- Tech stacks: React JS, Tailwind CSS, Firebase
- Collaborated in a team to design and develop a modern e-commerce web application
- Implemented core e-commerce features such as product listings, user authentication, and order management
- Practiced component-based architecture and state management in a collaborative development environment
- Designed a clean and intuitive UI/UX to improve user navigation and shopping experience

Skills

Tech & Stacks:

- Web Dev (Laravel, VueJS, Tailwind CSS, MySQL, PHP, JavaScript)
- Computer Systems (routers, switches, Linux Systems)

Language:

- Mandarin
- Hokkien
- Filipino
- English
