## SUMMARY

Junior Full-Stack Developer (Laravel) shipped a production PACS for a DOH EAMC Eye Center with six other projects spanning web, mobile, machine learning, and network infrastructure.

## EXPERIENCE

### Full Stack Junior Software Developer Intern

Sampaloc, Manila

FEU Institute of Technology | Information System Development and Training Unit

April – December 2025

- Developed a hospital PACS for DOH EAMC Eye Center, supporting ophthalmic imaging workflows with secure image management and role-based access control.
- Led development as the primary programmer in a three-person team, coordinating with design and documentation roles and reporting progress to project supervisors.
- Handled requirements analysis through deployment, using AI-assisted tools such as Claude Code to support development.

## PROJECTS

### FitGroove | Personal Project

July 2026

*Tech: Flutter, Dart, SQLite, Riverpod, Drift, GoRouter, NSD, Kotlin, Swift*

- Built and Designed an offline-first cross-platform fitness app architecture with Drift and Riverpod management that is fully functional with no backend or user accounts.
- Implemented peer-to-peer workout sharing routines over LAN (NSD/mDNS discovery) with 5 content types.

### Laboratory Information Management System | Personal Project

March 2026

*Tech: Laravel, Blade, Alpine JS, Tailwind CSS, PostgreSQL*

- Built a full-stack system for lab requests registration, samples tracking, and integrated clinical workflow interfaces across different users on LAN.
- Implemented role-based modules for technicians, supervisors, and administrators.

### MVS Point of Sale System | Personal Project

August 2025

*Tech: Laravel, Livewire, PHP, Tailwind CSS, MySQL*

- Built a full stack POS system with real-time order/delivery tracking management, sales and inventory reporting.
- Built weighted-average cost tracking and live GP/COGS dashboard from sales and inventory data.

### Bleep | Personal Project

December 2025

*Tech: Laravel, Vue JS, PHP, Reverb, Tailwind CSS, MySQL*

- Built a microblogging platform extending Laravel Chirper with custom and additional features.
- Implemented real-time chat using Laravel Reverb WebSockets.

### VIAMM: An Assistive Management System for the Visually Impaired | Capstone Project

December 2025

*Tech: Codelgniter 3, Kotlin, Android, PyTorch, TensorFlow, EfficientNet, Firebase*

- Developed assistive POS system for visually impaired massage therapists with text to speech navigation and order management.
- Built Philippine currency recognition and change calculation using machine learning.

### TrailVenture | Team Project

June 2024

*Tech: React JS, Tailwind CSS, Firebase*

- An e-commerce platform with authentication, product/order management, and a component-based responsive UI.

**Tech:** Windows Server, Ubuntu Server, Pi-hole, Samba/NAS

- Repurposed legacy hardware into a server running pi-hole that acts as DNS ad/tracker blocker for the network.
- Configured LAN accessible storage (NAS) for local file sharing and backup.

SKILLS

**Web:** HTML, CSS, JavaScript, TypeScript, PHP, Laravel, Vue JS, React JS, Next JS, Tailwind CSS, Bootstrap 5, Python

**Mobile:** Flutter, Dart, Kotlin Swift, Java

**Database:** MySQL, PostgreSQL, SQLite, MongoDB

**Systems & Networking:** Linux (Ubuntu, Fedora), Windows Server 2012 R2, Cisco/CCNA fundamentals

**Tools:** Git, GitHub, Docker, Postman, Figma, Jira, XAMPP, Laragon, phpMyAdmin, HeidiSQL, pgAdmin, REST API

**Language:** English, Filipino, Mandarin, Hokkien
